

For universities, healthcare and training teams

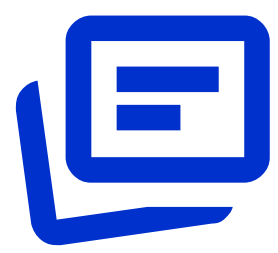

Simulation training, on demand

Give learners realistic conversations with lifelike AI avatars, personalised feedback and 1,000+ ready-to-use scenarios.

hello@simchat.ai

How SimChat works

Build your scenarios

Generate scenarios from your own materials in minutes, or draw on a library of 1,000+ ready-made scenarios.

Generate new scenario using SimChat

History taking ▾

Create a history-taking scenario where a 29-year-old woman presents to general practice with abdominal bloating

📎 Attach files

🔍 Examples

🌟 Generate scenario

Practise anywhere

Learners interact with a lifelike AI avatar. No specialist hardware or software downloads required.

Review feedback

Learners receive detailed feedback against your chosen rubrics after every conversation.

Automark

86%

- ✓ Introduces self and role
- ✓ Confirms name and date of birth
- ✓ Asks about onset and duration
- ✗ Explores ideas and concerns
- ✓ Screens for red flag symptoms

AI feedback

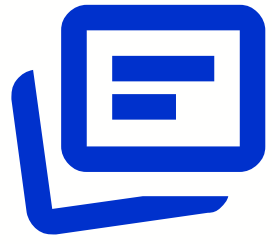

- **Areas performed well**
Clear introduction and a well-structured, open approach to exploring the history.
- **Suggestions for the future**
Explore the patient's ideas and concerns earlier, and screen for weight loss.
- **Not asked, but in the script**
Change in bowel habit and a family history of coeliac disease.

Everything you need to run communication training at scale

Scenarios in 60 seconds

Describe what you need, attach your reference materials, and let SimChat produce your scenario.

Scale across your organisation

Deploy scenarios to learners across departments, courses, and sites from a single admin dashboard.

Three simulation modes

Choose which modes of interaction to enable for each scenario including video, voice and text.

Rubric-based assessment

SimChat assesses each conversation against your chosen rubrics, providing tailored learner feedback and cohort-level insights.

Built for institutions

Single sign-on (SSO), LMS integration, white-label branding and video meeting integration (Microsoft Teams/Zoom).

Custom avatars and voices

Easily create an unlimited number of custom photorealistic avatars and voices tailored to your requirements.

What our customers say about us

“

SimChat provided our learners with realistic, clinically relevant encounters that supported meaningful practice of history-taking in a low-stakes environment. We see SimChat as a valuable partner in advancing innovative assessment within our OB/GYN clerkship.

Dr Aparna Sridhar, MD

Professor of Obstetrics & Gynaecology
UCLA Health

“

We are using SimChat to build customized training cases for paramedics, preceptors and prehospital leaders and we're blown away with the flexibility and quality of this tool! We're able to see their conversations in real-time and provide meaningful feedback.
