

Realistic communication skills training, on demand, at scale.

SimChat is an AI simulation platform for communication skills training built by the team at Geeky Medics. Learners practise realistic scenarios by text, voice or video avatar. Choose from a library of 1,000+ ready-made scenarios or build your own from existing materials in minutes.

500K+ AI-CONVERSATIONS DELIVERED TO DATE	1,000+ READY-MADE SCENARIOS	1min. QUICKLY GENERATE SCENARIOS	15+ YEARS IN HEALTHCARE EDUCATION
--	---------------------------------------	--	---

Core Capabilities

 Rapid Scenario Creation Upload your documents or describe a scenario. Generated in 60 seconds	 Custom Marking Rubrics Standardised assessment against your own competency frameworks
 Curriculum Mapping Upload your curriculum as CSV and map scenarios by topic/domain	 Cohort Management Groups, collections, and granular access control per cohort
 Analytics Dashboard Individual and cohort performance tracking with exportable reports	 White-Label Branding Custom logos, colours, and organisation-specific URLs

Three Simulation Modes

 Text Multi-turn text conversations	 Voice Real-time spoken dialogue	 Video Avatar Face-to-face with AI avatars
--	---	---

Customisable scenarios

Customise avatars and voices
 Pick from our library of ready-made avatars, or create your own

Set behavioural parameters
 Define the interaction type, from peer-to-peer feedback, challenging conversations and patient consultations

Add cultural and contextual cues
 Shape each avatar's directness, formality and tone to reflect real-world variation

Built-In Assessment & Feedback Workflow

- 1 AI Conversation**
 Learner completes multi-turn scenario
- 2 Self-assessment**
 Weighted checklist with optional AI auto-marking
- 3 Reflective Questions**
 Organisation-set questions with model answers
- 4 AI Feedback**
 Personalised strengths and areas for improvement
- 5 Faculty Review**
 Review transcripts, adjust marks and provide feedback

Example Use Cases

Clinical Communication

- History-taking and counselling
- Breaking bad news and other difficult conversations
- Patient handover and referral

Professional Skills Training

- Interprofessional teamwork scenarios
- Leadership and management conversations
- Safeguarding and escalation practice
- Cross-cultural communication

Assessment & CPD

- Formative low-stakes practice at scale
- Summative assessment with faculty review
- CPD documentation with exportable reports
- Pre-placement readiness checks

Emergency Situations & Prescribing

- Triage and scene management dialogue
- Patient assessment communication
- Medicines management conversations
- Reflective debrief practice

SimChat vs. Traditional Methods

	SimChat	Simulated Patients (Actors)	Role-Play / Peer
Available 24/7	✓	✗	✗
Consistent performance	✓	Variable	Variable
Scales to 1,000s concurrently	✓	✗	Limited
Instant standardised feedback	✓	✗	✗
Full transcript + analytics	✓	✗	✗
No scheduling required	✓	✗	✗
No dedicated facilities	✓	✗	✓

Security, Privacy & Compliance

GDPR Compliant
Published DPA & data isolation

No AI Training
Customer data is never used to train models

EU Processing
Available per-org via Microsoft Azure

Access Controls
Role-based with optional 2FA

Testimonials

“Our experience with SimChat has been highly positive. Their AI-based OSCE platform provided our learners with realistic, clinically relevant encounters that supported meaningful practice of history-taking, clinical reasoning, and assessment.”

Dr Aparna Sridhar, MD · Professor of Obstetrics and Gynecology | UCLA Health

“We are blown away by the flexibility and quality of this tool! The cases are integrated into our online and in-person education with tailored categories for specific learners.”

Kayella Mackenzie, A-EMCA, ACP, CP · Founder, GoMedic

Getting Started

Free Trial

Two admin accounts, five users, scenario creation - no commitment

Book a Demo

See SimChat in action with a tailored walkthrough for your team

Deploy in Days

Cloud-hosted platform - no IT infrastructure, no lengthy procurement
